### DESCRIPTION

The I/O Board is a collection of connectors designed to add signal capacity to the system. The board contains no active components; its only purpose is to deliver signals to and from the backplane. The board contains several plugs/jacks to provide a path for audio inputs/outputs to the system.

The I/O Board contains:

- Removable screw terminals for the "UNSEL---SEL" recorders
- "PAGER INPUT HI---PAGER PTT"

- A DB9 for all of the "CALL DIRECTOR" signals
- Removable screw terminals for PTT's
- A DB9 for "FOOT SWITCH 1" (B/G PTT, MONITOR PTT)
- A DB9 for "FOOT SWITCH 2"(B/G PTT, MONITOR PTT)
- Removable screw terminals for "RELAY 1 RELAY 2"
- Removable screw terminals for "DIG. IN 1 DIG. IN 2".
