ADAPTING YOUR WEATHERADIO FOR SPECIAL NEEDS?
ITS AS EASY AS 1 2 3 !!!

Want to make sure you never miss a NOAA weather emergency alert broadcast when you’re at home with your Weatheradio? Here’s how!

1. Get this stuff at your local RadioShack store or order it from www.radioshack.com:
   - Weatheradio (like Cat. No. 12-250)
   - X-10 universal interface (like Cat. No. 980-0232)
   - X-10 appliance module (like Cat. No. 61-2681)
   - Flashing light (like Cat. No. 42-3054)
   - Powerhorn siren (like Cat. No. 980-0231)
   - 2-conductor cable (like Cat. No. 278-567)

2. Connect a Plug ’n Power or X-10 universal interface to your Weatheradio’s external alarm terminals like this.

3. To see an alert from almost anywhere in your home, connect a flashing light like this to a Plug ’n Power or X-10 appliance module.

To AC Outlet

Weatheradio

X-10 Universal Interface

Make sure this is set to A.

2-Conductor Cable

Set these to the same unit code and house code as the universal interface and appliance module.

You can also plug a Powerhorn siren like this directly into any AC outlet to hear the alert sound from your Weatheradio from anywhere in your home.

To AC Outlet

Appliance Module

Set these to the same unit code and house code as the universal interface and Powerhorn siren.

Set these to the same unit code and house code as the universal interface and appliance module.

You can get everything you need to see and hear weather alerts anywhere in your home at your local RadioShack store, or surf us on the web.
