DESCRIPTION

Digital Cross Connect Panel ROA117 2225 is located at the Simulcast Control Point in RS-232 version systems and mounts on the back of the Digital Rack/Cabinet (See Figure 1). This panel provides 99, 50-position (pin) connectors and one telephone modular jack with top entry (See Figure 2). Interconnection of all Simulcast Control Point digital signals is accomplished through the Digital Cross Connect panel (B400) to the backplanes of the various shelves within the system. These shelves contain system modules. The Digital Cross Connect panel is hinged so that all jacks are inside and can only be accessed by swinging the panel open.

The wiring for the cross connect panel is shown in a WIRING LIST. This WIRING LIST shows where the signal (Function) originates FROM and where the signal is going TO.

Example:

Connector J1, Pin 11		
FROM	TO	FUNCTION
J1-11	J80-1	PTT_OUT_CH01
If you look at J80-1 you will read:		
Connector J80, Pin 1		
FROM	TO	FUNCTION
J80-1	J1-11	PTT_OUT_CH01

NOTICE!

This manual covers Ericsson and General Electric products manufactured and sold by Ericsson Inc.

NOTICE!

Repairs to this equipment should be made only by an authorized service technician or facility designated by the supplier. Any repairs, alterations or substitution of recommended parts made by the user to this equipment not approved by the manufacturer could void the user’s authority to operate the equipment in addition to the manufacturer’s warranty.
