Utilizing your personal computer, Radio Service Software (RSS)/Customer Programming Software (CPS)/Customer Configuration Software (CCS) enables you to add or reprogram features/parameters as your requirements change. RSS/CPS/CCS is compatible with IBM XT, AT, PS/2 models 30, 50, 60 and 80. Requires 640K RAM. DOS 3.1 or later. Consult the RSS users guide for the computer configuration and DOS requirements. (For HT1000, MT/MTS2000, MTX838/8000/9000, Visar and some newer products — IBM model 386, 4 MEG RAM and DOS 5.0 or higher are recommended.) A Radio Interface Box (RIB) may be required as well as the appropriate cables. The RIB and cables must be ordered separately.

Licensing: A license is required **before** a software (RVN) order is placed. The software license is site specific (**customer number and ultimate destination tag**). **All sites/locations must purchase their own software.** Be sure to place subsequent orders using the original customer number and ship-to-tag or other licensed sites; ordering software without a licensed customer number and ultimate tag may result in unnecessary delays. To obtain a no charge license agreement kit, order RPX4719. To place an order in the U.S. call 1-800-422-4210. Outside the U.S., FAX 847-576-3023.

Subscription Program: The purchase of Radio Service Software/Customer Programming/Customer Configuration Software (RVN & HVN kits) entitles the buyer/subscriber to three years of free upgrades. At the end of these three years, the subscriber must purchase the same Radio Service Software kit to receive an additional three years of free upgrades. If the subscriber does not elect to purchase the same Radio Service Software kit, no upgrades will be sent. Annually a subscription status report is mailed to inform subscribers of the RSS/CPS/CCS items on our database and their expiration dates.

Notes:

- 1) A subscription service is offered on "RVN"-Radio Service Software/Customer Programming/Customer Configuration Software kits only.
- 2) "RVN" software must only be procured through Radio Products and Services Division (RPSD). Software not procured through the RPSD will not be recorded on the subscription database; upgrades will not be mailed.
- 3) Upgrades are mailed to the original buyer (customer number & ultimate tag).
- 4) SP software is available through the radio product groups.

The Motorola General Radio Service Software Agreement is now available on Motorola Online. If you need assistance please feel free to submit a "Contact Us" or call 800-422-4210.
