We have received a number of questions from the field concerning the Camera Mount Adapter (option 10) for the A-7550. The adapter is a modified Tektronix part and is made specifically for the TEK C-4 Camera. The C-4 is a pistol-grip type camera which allows the user to hold the camera and adapter against the A-7550's display and operate the camera with one hand. We can not use an adapter which latches to the display bezel because of the limited clearance between the display bezel and the unit's chrome bezel.
